Onboard your agent to Runpod

Paste one line into your coding agent and it installs the Runpod skills and MCP server. Then you can deploy Pods and Serverless endpoints.

Copy this into your coding agent

```
Set up Runpod for me: fetch and follow this guide https://agents.runpod.i…
```

Pods

Deploy a dedicated GPU instance. Ideal for development, testing, and fine-tuning.

Deploy Pod

Create an endpoint

smergers-ai-reader

Queue based

Manage

Idle · $0.00000/s · 0 running workers · 0 jobs in progress · 0 jobs waiting in queue

Overview | Metrics | Logs | Requests | Bulk Requests | Workers | Releases

Quick start

See examples of how to interact with this endpoint using different programming languages.

API key — View all

YOUR_API_KEY — Generate key

Run jobs on this endpoint by making requests using your API keys or your browser. Workers will automatically scale to meet demand.

Job operations documentation

cURL | POST /runsync — Start a job and wait for it to complete. The response will contain the job output. Copy | Run in browser

```
curl -X POST https://api.runpod.ai/v2/2y90x5ojwpgxnh/runsync \
    -H 'Content-Type: application/json' \
    -H 'Authorization: Bearer YOUR_API_KEY' \
    -d '{"input":{"prompt":"Your prompt"}}'
```

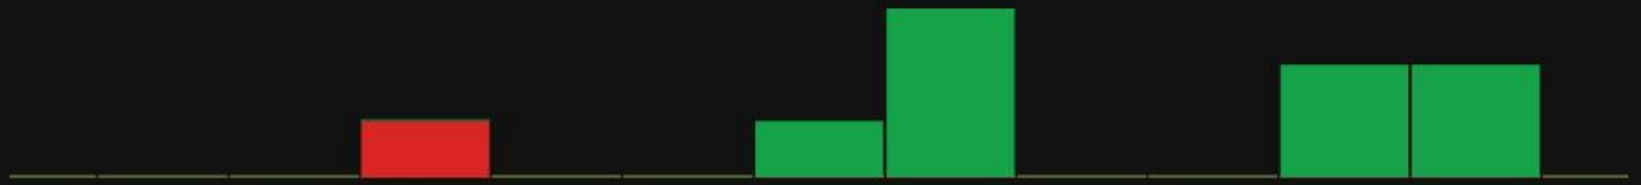

Endpoint ID	2y90×5ojwpgxnh	Created	Oct 24, 2026
Docker image	runpod/worker-v1-vllm:v2.30.1	GPU count	1
GPU type	24 GB Pro
